

COMPLETE VISUAL-PREFIX REUSE

1,160 primary closed-loop episodes | separate 50-episode timing pilot

A Closed-loop success versus reuse

- permissive settings (100 episodes each)
- conservative settings (30 episodes each)
- ◇ dense reference (100/100)
- ★ final conservative setting (69/70)

B Measured CUDA-time budget

Even zero-cost visual processing at most 1.189x theoretical speedup
